

Second Grade Read Me First

Introduction

Welcome to the Nemeth Braille Code Curriculum. We are excited you have chosen to use the materials with your students. This document will give you an overview of all materials included in the curriculum. Feel free to use any of the documents you choose.

All braille files use a 32-cell line length unless noted with a 40 in the filename. These .brf files can be opened and embossed from BrailleBlaster, Duxbury (DBT), Braille2000, Perky Duck, or Tiger Designer. The .brf files that do not include spatial content, simple tactile graphics, and charts can be read with refreshable braille displays or notetakers.

All data collection sheets, including recording sheets and data tables, are also available for download as both Word files and Google Docs files. You will need to download or save a copy of the documents to enter your own data. These downloadable files are available at https://drive.google.com/drive/folders/13O26FGhgcvP2pDsmk5328UZsxtJ_nZ3V?usp=sharing.

In the filenames, we have used the following abbreviations to indicate certain types of files.

- G = Grade
- M = Module
- C = Contracted
- UC = Uncontracted
- 40 = 40-cell wide braille file

Commercially Available Materials

Commercially Available Materials contains a list of additional materials that can be used to support instruction. These are organized to align with the main sections of the curriculum. The list can be found at <https://accessibility.pearson.com/resources/nemeth-curriculum/commercial-materials/>.
